The SunCar – Trendy, high-quality product

The SunCar has been developed and produced with all the quality and features that one would expect from a tanning specialist such as Alisun. The many years of experience and specialised knowledge of tanning technology mean that all the components are carefully harmonised so as to give the best tanning results.

The unique stand, patented by Alisun, means perfect ease of use. The EasyLift® system enables the SunCar to be ready for use in less than 15 seconds. Just press the foot pedal down and raise the canopy to the right height with the simple touch of one hand. The SunCar is equipped with four powerful professional high-pressure lamps. In combination with the specially shaped reflector these produce the best possible tanning action, achieving an extra large tanning field of 190 x 70 cm.

The option of using the two 1000-Watt Infrared tubes not only allows you to acquire a tan but also to relax more fully and enjoy the comfortable warmth of the Infrared light. Relaxation in Infrared light is safe and suitable for young and old. The warmth from the Infrared rays penetrate deep into the skin thus stimulating metabolism and blood circulation in the skin and muscles, this ensures a greater supply of oxygen, higher calorie burning rate and speedier elimination of waste.

The Ambiance – The personal touch

Beauty, a sense of well being, and for some also romance – that is what typifies Ambiance's atmosphere. The Ambiance addresses the need for a private relaxation corner... wherever this maybe. It symbolises lifestyle and a desire for more. Wonderfully comfortable, subtle and user friendly. Harmonious colours and details point to its strong design but never intrude. Advanced use of a state of the art technology. Subdued luxury balanced with complete rest. This brings sun lounging at home within reach!

The smooth springs in the Ambiance canopy help it set to the right angle in a single move. In combination with its wide tanning surface, its tunnel shape ensures that the tanning rays will reach every part of the body for a nice even tan. Its ingenious cooling system ensures better tanning results, while also extending the lamp life. It boasts perfect light reflection thanks to its mirror reflector plate to make the most of every single ray of light.

Allura – Glamorous Living

There is no denying it – the Allura reflects your personality. Show who you are, what you do and what your goals are. Eye-catching luxury and comfort, a partner in lifestyle and a friend in living. The Allura offers options and answers your desire for relaxation. Modestly dominant, stubbornly chic, feels at home anywhere even in the lounge. Offers thrilling expectations and lives up to its promise. A dynamic character that you cannot ignore.

Clever placement of the lamps gives the Allura an extended tanning surface. Ideal for taller people. Circular tunnel shape with mirror reflector plate, broad tanning surface – with the tanning rays reaching every part of your body; your sides will also get a beautiful tan. The ingenious cooling system promotes tanning results and extends lamp life.

The results prove it!

Salsa - fun outside, quality inside

The salsa will hover over your bed in an instant...where you are comfortable. With its trendy style, the Salsa looks the part in the lime green on a steel stand of modern silver grey. A top design that is a feast for the eyes. Spot the playful details, such as the hip transparent timer dial and tightly defined logos. Easy to operate. Maximum safety. Extremely stable on a solid stand and easy to move. The Salsa is worthy of being seen and does not need to be hidden in the corner. The Salsa guarantees moments of enjoyment within easy reach. The Salsa already boasts many lazy lovers of tanning.

The Salsa features an asymmetrical stand (Alisun patent!) to give you unrivalled space to lie down. Simply roll your Salsa to wherever you want it on its luxury castor wheels. Its light canopy and low centre of gravity make your Salsa extremely safe – and that is a comforting thought.

The V28pro The Home Vertical Tanning Unit

The V28 pro represents fast and comfortable tanning. The 28 powerful tubes are positioned close to the body for intensive and uniform tanning of your entire body within a short period of time. The tubes have a unique length of 190cms / 6ft 2" . This extra length also enables taller people to get a tan from head to toe. And there are no "white spots" left on the pressure points after tanning, because the skin does not come into contact with the acrylic sheet of the booth. Real full-body tanning on no more than 1 sq m of floor space - you simply must try the V28 pro

Vertical sun beds are becoming increasingly popular in tanning salons. The V28 pro is here....from Alisun

Comfort

While tanning, the integrated body-cooling system of the V28 pro keeps you comfortably cool. A continuous flow of fresh air is blown all around your body, creating a constant and pleasing temperature. The level of body-cooling can be electronically adjusted to your individual wishes, from a light breeze, to a powerful, refreshing airflow. The special face-cooler also allows you to adjust the direction of the airflow so that optimal comfort is guaranteed for everyone.

Versatile

All functions of the V28 pro are easy to operate with the electronic remote control which employs the user friendly EasyUse® software. The digital timer has a memory function and gives a beep one minute before the set tanning time is up. The timer also keeps track of the number of operating hours of the tubes so that you can easily check at any moment if the tubes need replacement (after around 500 hrs) All the information is displayed on the clear LCD display. The remote comes with an integrated magnet allowing you to attach it to the middle console. Because of the stable stand and Easy Use door-system, the V28 pro even fits in smaller spaces - ideal where there isn't enough room for a lie-down sunbed. The door construction ensures a smooth operating when closing and opening the door.

Quality

The V28 pro is supplied with a separate cooling system for the tubes. Fresh air from the surroundings is constantly flowing along the full length of the tubes, allowing them to perform significantly better and last considerable longer. The fans of the tube cooling are stylishly integrated in the Powerstream design of the V28 pro. Because of its trendy colouring in Cream White and Ocean Blue, the V28 pro fits in everywhere.

Security

The V28 pro is supplied with an electronic childproof lock. Furthermore the V28 pro meets very strict European standards, quality and test requirements (TuV, EMC) and carries the CE mark. Alisun is renowned for reliability, long lifespan and guaranteed high quality. This is why you get a standard warranty of 3 years on the V28 pro.
